

BioLite KettlePot

2-in-1 cooking and pouring

Featherlight & food safe

CampStove carrying design

The BioLite KettlePot combines maximum functionality and space efficiency into a single piece of cookware. The snap-on BPA-free kettle top and vertical handles facilitate easy pouring while the elongated stainless steel body cooks like a pot. Centering base ring improves stability while serving as a heat shield - blocking wind and protecting the flame for faster boiling times. An instant hard carrying-case, the CampStove stores inside for a perfect fit.
